

AlkaHydrate Filter Cartridge

Alkalising & Mineralising Water Filter Cartridge

pH Balanced Alkaline Water
Helps stabilize your body's pH

Transforms Acidic Drinking Water
Enjoy Alkaline, Calcium Ion Water

Installed with Your Choice of System
To compliment it's filtration qualities

- The AlkaHydrate filter cartridge will provide you with water that is energised and mineralised.
- Helps stabilise your body's pH balance
- Ideal for those looking to reduce acidic toxic waste in the blood, tissues and fluids of the body, allowing it to adhere to a more alkaline state required by most human metabolic processes.

Raises pH Level

The filter uses a series of different medias to effectively raise the pH level of your drinking water. Drinking alkaline water helps our body dissolve acid wastes - therefore making it easier for the body to dispose of them naturally. Since the accumulation of acid wastes is aging, the reduction of acid wastes is anti-aging!

Adds Natural Minerals

Introducing natural minerals such as Calcium, Magnesium, Potassium and more. These ionic minerals are absorbed by the body to improve strength and function of body processes.

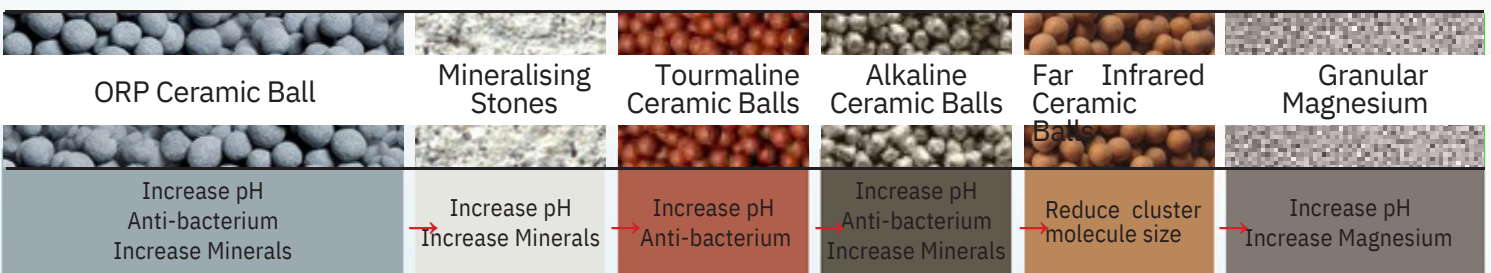

Lowers ORP

Far-infrared rays emitted by the filter media result in structurally smaller clusters of water molecules, making it easier for your body to absorb meaning you can stay better hydrated. The AlkaHydrate filter significantly increases the negative ORP (Oxygen Reduction Potential) enabling it to decrease the oxidation of substances or cells thus serving as a potent anti-oxidant.

What is ORP?

ORP – Oxidation Reduction Potential - is the ability of water or any other media to oxidise (or more importantly – decrease the oxidation) of another substance or body. For example - air, with a positive ORP will oxidise metal thus causing corrosion or rust. Essentially, any substance that oxidises, disintegrates. Water with a negative ORP has the ability to decrease oxidation hence prolonging the life of a substance or in this case our physiology.

Filtration Process

AlkaHydrate Filter Cartridge

- The AlkaHydrate filter cartridge can be incorporated as an additional stage to most of our standard filter systems including both countertop and undersink models.

Examples of our Alkalising Filter Systems

A Ultra High Purity Reverse Osmosis Undersink Includes the AlkaHydrate filter as an additional 5th stage

Of all the methods to purify drinking water for domestic use, the process of Reverse Osmosis is the most advanced, economical and effective.

The Ultra High Purity Reverse Osmosis Undersink offers a compact design, with easy maintenance and hygienic “twist-off” filter cartridges. The system includes a reservoir holding approximately 10 litres of pure water enabling you to dispense on demand. It includes your choice of a premium, designer ceramic disc faucet. All plumbing parts are also included alongside easy to follow DIY installation instructions.

B Ultra High Purity Reverse Osmosis Countertop Includes the AlkaHydrate filter as an additional 4th stage

The Ultra High Purity Reverse Osmosis Countertop delivers identical quality pure water as the undersink system - free from chemicals, pesticides, heavy metals and Fluoride. Plus with the added convenience of portability, it is ideal for those renting. No mains plumbing required - the system simply attaches to your existing kitchen faucet using the fittings included.

Ease of maintenance is ensured with our hygienic ceramic “twist-off” filter cartridges. The system comes with easy to follow installation instructions and maintenance guide.

C UltraCeram® Ceramic Twin Fluoride Undersink Includes the AlkaHydrate as an additional 3rd stage

The UltraCeram® Ceramic Twin Fluoride Undersink features a Fluoride Removal filter, made in the USA, followed by the UltraCeram® Carbon, made in the UK. This combination delivers drinking water free from bacteria, parasites, chemicals, heavy metals and Fluoride. It includes your choice of a premium, designer ceramic disc faucet. All plumbing parts are also included alongside easy to follow DIY installation instructions.

Each unit is tested before sale and is Australian Water Mark Standard certified - your guarantee of quality.

 Our systems are handbuilt from local, USA & UK components and wet tested before sale.
